

Vehicle charge communication unit

Cost-attractive solution for battery-electric vehicles

Powertrain and electrified mobility

State-of-the-art

Software and hardware solutions for all charging standards in a compact control unit

- Versatile variants for regional and customer-specific requirements
- State-of-the-art software and hardware solutions for all charging standards
- Proven solutions for cybersecurity and functional safety in accordance with ISO 26262 and up to ASIL B
- Cost-effective control unit for charging communication that can be deployed with great flexibility

Cost-efficient

A single control unit for both electric vehicles and plug-in hybrid systems
